

Home

iVEE is an English language instruction program designed specifically for entry level service workers in (1) housekeeping and (2) utility work (dishwashing and kitchen help). Additional job categories are in development.

English is the language of most workplaces in the United States, and iVEE can help individuals with an English language barrier to

1. get a job
2. keep a job
3. improve on the job
4. advance in the job.

iVEE is a unique computer program that anyone can navigate. Even people who have never used a computer before have successfully learned to point and click with just a few minutes of instruction. And that's all they need to know to begin learning Vocational Easy English.

iVEE is self-paced so students progress at their own rate and on their own schedule. Each lesson is self-contained, requiring no additional materials.

iVEE also offers employers/tutors/counselors the option of tracking progress as students move through the lessons.
